BDS Unmasked: Radical Roots, Extremist Ends.

BDS is not a peaceful protest movement to advance the establishment of a Palestinian state next to Israel. Rather, the Palestinian and global BDS leadership insist Israel must be delegitimized, isolated, eliminated-and replaced by a 23rd Arab state.

BDS is a new strain of an old boycott "virus." BDS continues the 100-year Arab boycotts of Israel that began before Israel's reestablishment in 1948. Only now BDS warfare has been mainstreamed and legitimized. In fact, BDS is political warfare against the existence of Israel as a Jewish nation state. It has attracted support from artists, musicians, academics, politicians even some Jewish and Christian activists. Its time to expose the BDS deception.

Come hear about:

- BDS linkages to radical Islamic and Arab terror groups
- BDS driven violence, radicalization and Anti-Semitism on US University campuses
- What can be done to stop BDS warfare in America
